

Genes4Life

PERFECT MATCH
& COMPLETE TEST

The complete test of compatibility
for future parents and donors

Amplexa
Genetics®

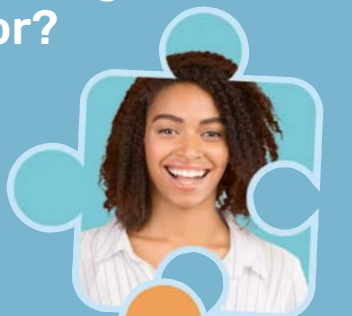

You are ready to become a responsible mother or father, either alone or with someone else.

Do you need help finding the perfect donor?

Genes4Life is a test performed on future parents and their donor searching for the **PERFECT MATCH**.

Some rare diseases may be passed on to a child, if a parent and donor have a genetic mutation in the same gene.

When the donor and future parent are compatible, it is a **PERFECT MATCH**, because both are free of genetic mutations that may cause rare inherited diseases.

We help you select the right donor in 3 simple steps

1.

You choose a donor.

2.

Amplexa Genetics performs the Genes4Life test on you and your donor using a saliva or blood sample.

3.

We deliver your result within four weeks.

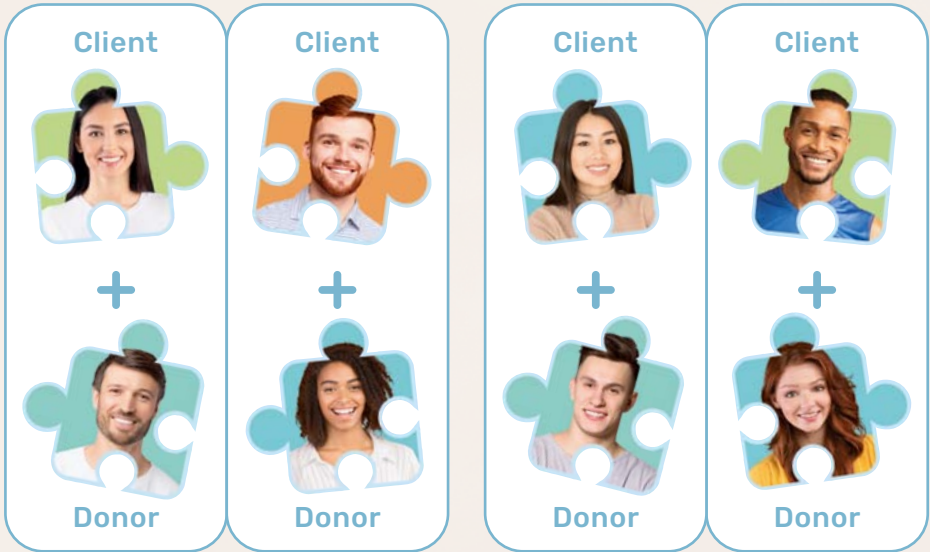

Genes4Life

FIND THE PERFECT MATCH

Genes4Life is the **COMPLETE** test. We screen for mutations responsible for more than 400 rare diseases.

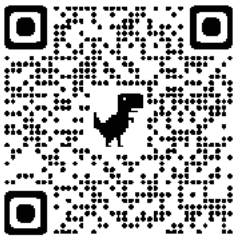

Genes4Life

Delivers two types of results

It's a match

It's not a match

If your result is not a match, repeat steps 1, 2, and 3 and find your perfect match
